

DADE. 1692.

THE
COUNTRY-MAN'S
KALENDER,

For the Year of CHRIST, 1692.
Being LEAP-YEAR.

Containing the daily Motions of the Sun and
Moon, with the Aspects of the Planets, and their Conjunctions with the Moon; And from thence the Inclination of the Air, and Alteration of the Weather throughout the Year.

Accommodated with other Useful Things: As,

- 1 The Suns Rising and Setting for every Day in the Year.
- 2 A Chronology of several Remarkable Things.
- 3 The Commencement of the Four Seasons, and their Nature.
- 4 The Eclipses of the Sun and Moon.
- 5 Physical Verses, and Rules for Husbandry and Gardening.
- 6 Observations, and Natural Prognosticks for weather.
- 7 How to judge of Diseases in Men or Women, by the Urine.

And for the benefit of Country Farmers,
An Account of several Diseases incident to Cattel,
with the Causes and Cures of them.

Calculated for the Meridian of the Middle Part of
ENGLAND:

And so the more Useful for that, and the Kingdom of IRELAND also.

Printed by J. Miller, for the Company of Stationers. 1692.

Common Notes and Moveable Feasts, 1692.

According to the
English Account. Foreign Account.

1	0 0 1	0 0 0	0 0 3	0 0 4	0 0 7

The Use of this TABLE.

Example. To find the Interest of 70*l.* for 6 Months; Find 70*l.* in the first Column, and right against it, in the Column of 6 Months, is 2*l.* 2*s.* and so much is the Interest. For the Interest of the same Summ in 9 Months, look for the Interest in 3 Months, which is 1*l.* 1*s.* this add to the Interest for 6 months, the Summ is 3*l.* 3*s.* the Interest of 70*l.* in 9 months. Also to find the Interest of 75*l.* for 3 months: First, look the Interest of 70*l.* for 3 months, which is 1*l.* 1*s.* Likewise the Interest of 5*l.* for 3 months, is 1*s.* 6*d.* this added to 1*l.* 1*s.* maketh 1*l.* 2*s.* 6*d.* which is the Interest of 75*l.* for 3 months.

D A D E.

A
Prognostication:

In which you may behold the
State of this Present YEAR
of our **LORD GOD,**

CONTAINING

The Description of the Four Seasons,
the *Eclipses*, the *Passions* of the *Planets*,
and the *Inclination* of the *Air*.

Also *Physical Verses*, and *Short Notes*
and *Rules* for *Husbandry*, for every
Month throughout the Year.

With divers other *Notes* and *Rules* of
Good Consequence, not formerly Published in
this **PROGNOSTICATION.**

By **WILLIAM D A D E**, Gent.

LONDON,

Printed by **T. F.** for the Company of
STATIONERS.

Physical *P E R S E S*
A N D
Rules for *H U S B A N D R Y*.

Of JANUARY.

If thou be sick, and help would'st have,
The Counsel of the Learned crave:
If thou hast health, to keep thee so,
Fly Idleness as deadly Foe.

January's Instructions for Husbandry.

This Month set all kind of Fruit-Trees, and Quicksets: In the New of the Moon (the wind and weather observed) you may set Pease and Beans, Parsnips and Oats, if the weather prove mild, and the Moon decreasing.

Of FEBRUARY.

Be choice of Food in any wise,
To keep thee warm also precise:
Beware likewise thou let not Blood,
Except the Learned say 'tis good.

Februaries Instructions for Husbandry.

This Month set Roses, with all other kind of Plants and Quicksets, sowe Pease and Onions as in the Month before (the weather consider'd) you may now Garden for Sallet-herbs, Pot-herbs, and such like.

Of MARCH.

Now Bleed, and Bath, if thou desire,
And Purge also (if need require)
Ill humors do in many breed,
Provide in time before you need.

March's

March's Instructions.

This Month (in the New of the *Moon*) Graft, Set Quick-sets, and Vines, Cut your Hedges and Vines already growing. Also you may sowe Onions, Beans, and Oats, and all manner of Garden-herbs.

Of APRIL.

*Now whelshome Baths thou may'st frequens,
Let Blood also, and not repent;
These are good means thee to defend,
From Grieffs, the which on thee attend.*

April's Instructions.

In this Month Pole your Hops, sowe Barley and Artichokes, Bark Trees for Tanners; sowe Hemp and Flax, set Cytrons, Melons and Cucumbers, and furnish and replenish your Gardens with Summer Herbs.

Of MAY.

*Rise early now this Month of May,
And walk the Fields that be so gay;
From Surfeiting see thou refrain,
Or sure it will procure thy pain.*

May's Instructions.

In the beginning of this Month you may sowe the Seeds of Summer Herbs, which could not endure the cold of the forepassed Months: You may yet sowe Hemp and Flax: Weed your Hop-Gardens, and take away superfluous Branches, and Moss your Gardens.

Of JUNE.

*Drinks New or Sweet, Taste not at all,
For, thereby grows no danger small;*

A A

And,

*And, to thy self such pastime take,
As may in God thee merry make.*

June's Instructions.

In this Month (at the Full of the Moon) Gather your herbs to keep dry for the whole year, Weed your Corn-fields and Gardens, Set Rosemary and Gilliflowers, Sow Lettuce, Shear Sheep, the Moon increasing.

Of JULY.

*Perfume thy house with Savours sweet,
But such as are for purpose meet,
Abroad as thou in Streets do'st go,
Defend thy self from stinks also.*

July's Instructions.

In this Month ply your Haying, Fallow your Lands for Wheat, Pull up Hemp that is ripe, get Rue and Wormwood to drive away Fleas and Moths. Dry Flowers in the shade, and then Sun them a little for fear of corruption.

Of AUGUST.

*As burning Heat will thee destroy,
So shivering Cold will thee annoy;
Let little sleep thee now content,
Purge not, nor Bleed, lest thou repent.*

August's Instructions.

Reap Wheat and Rye, cut down your Oats, Gather Garden-Seeds, Sow Lettuce and other Winter Herbs in the New of the Moon: Use moderate Diet, forbear to sleep presently after meat, take heed of sudden cold after great heat.

Of

OF SEPTEMBER.

*Raw Fruits (though ripe) may Sicknes bring,
Unripe much eat, a dangerous thing;
If now a Surfeit thou dost take,
When others sleep thou must awake.*

September's Instructions.

Set Artichoaks, Sow Seeds for Winter herbs, gather Hops and Apples, and other Fruits (which are fit to be gathered) about the Full of the Moon, the weather being dry. Cut Quicksets, Sow Wheat and Rye, kill Bees, make Verjuice, Sow Parsnips and Carrets; Remove and set Slips of Flowers; Set Roses, Strawberries and Barbaries: and remove Trees every New Moon till February.

OF OCTOBER.

*Warm Cloaths must now provided be,
Also warm Meats are good for thee.
Have good regard thy feet be dry,
Thou shalt avoid much harm thereby.*

Octobers Instructions.

Remove your Plants and Trees in the New of the Moon, and about the Full of the Moon gather such Fruit as you left ungathered the last Month. Set all kind of Nuts and Acorns: And cut your Rose-Trees but once in two years, if you intend to have store of Roses.

OF NOVEMBER.

*If Rheums do now molest thy Head,
It is not ill to sweat in Bed;
Feed on good Meats if Stomach serve,
Else seek for that which doth preserve.*

Novembers Instructions.

In the New of the *Moon* remove young Trees, set Crabtree-Stocks to Graft on; and in the Old of the *Moon*, set Pease and Beans, sow Parsnips and Carrets, make Malt, kill Hogs, and make Martimas-Beef.

Of DECEMBER.

Now cold December is come in,
The poor mans back is cloathed thin ;
Then Feed and Cloath him as you may,
The Lord will it three-fold repay.

Decembers Instructions.

This Month and the next are best to fell great Timber in the Old of the *Moon*, to uncover the Roots of your Fruit-trees, Fallow Land for Barley, cover Herbs from cold, look well to your Cattel, take Fowl with Nets or Lime-twigs.

Other Physical Observations.

Let the Sanguine Blood when the *Moon* is
in *Pisces*.

Let the Cholerick Blood when the *Moon*
hath her course in *Cancer* or *Pisces*.

Let the Melancholy Blood, when the Moon is in *Libra, Aquarius, or Pisces.*

Let the Phlegmatick Blood, when the
Moon is in *Sagittarius* or *Aquarius*.

Prepare Humours, the Moon in Gemini,
Libra or Aquarius.

Good to } Electuaries } The Moon } Cancer
purge with } Pills, } in } Pisces,
} Potions, } } Virgo.
Good

To take Vomits, the *Moon* being in *Taurus*,
Virgo, or the latter part of *Sagittarius*.

To purge the Head by Sneezing, the *Moon*
being in *Cancer*, *Leo*, or *Virgo*.

To take Clusters, the *Moon* being in *Aries*,
Cancer, or *Virgo*.

To stop Fluxes and Rheums, the *Moon* be-
ing in *Taurus*, *Virgo*, or *Capricorn*.

To Bathe, when the *Moon* is in *Cancer*, *Li-
bra*, *Aquarius*, or *Pisces*.

To cut the Hair off the Head or Beard,
when the *Moon* is in *Libra*, *Sagittarius*,
Aquarius, or *Pisces*.

Other brief Observations of Husbandry.

SEt, sowe Seeds, and Graft, the *Moon* being
in *Taurus*, *Virgo*, or *Capricorn*.

And all kind of Corn in *Cancer*.

Graft in *March* at the *Moons* increase, the be-
ing in *Taurus* or *Capricorn*.

Shear Sheep at the *Moons* increase.

Fell hard Timber from the Full to the Change.

Fell Frith, Coppice, and Fuel, at the First
Quarter.

Lib or Geld Cattle, the *Moon* in *Aries*, *Sagi-
tarius*, or *Capricorn*.

Kill Fat Swine for Bacon (the better to keep
their Fat in boiling) about the Full Moon.

*Natural Prognosticks for the Judgment of
Weather.*

THE foregoing Rules for the Judgment of the Weather, are such as are deduced from the Aspects of the Planets to the Moon, and among themselves; These here following, are such as are deduced from Philosophical Aphorisms. Therefore,

1. The resounding of the Sea upon the Shoar, and the murmur of Winds in the Woods, when the Wind is not stirring abroad, doth shew Wind to follow.
2. The obscuring of the small Stars, fore-shews Tempests.
3. When Stars seem to shoot, Wind comes from that Quarter.
4. If two Rainbows appear, Rain follows: But a Rainbow appearing after Rain, signifies fair Weather.
5. If the Sky be red in the Morning, it is a sure token of Wind or Rain to follow, or both; for the Vapors which cause that Redness will soon be dissolved.
6. If the Sun or Moon look pale, look for Rain; if fair and bright, fair Weather; if red, Wind.
7. If a dark Cloud be at Sun-rising, in which the Sun is soon after hid, it will dissolve it, and Rain will soon follow.
8. If a Cloud appear, and afterwards Vapors are seen to ascend up to it, it portends Rain.
9. If

9. If the Sun appear in the East, greater than it usually doth, it is a sign of Rain.

10. If a black Cloud appear in the West about Sun-setting, it will Rain that Night, or the Morning following.

11. If Mists come down from the Hills, or descend from the Sky, and settle in the Vallies, it promiseth fair and hot Weather. Also Mists ascending in the Evening from the Earth or Water, shew a hot day to follow.

12. Water-Fowls (as Sea-gulls, More-hens, &c.) when they flock and flie together from the Sea toward the Shore. Also when Land-Fowls (as Crows, Swallows, &c.) when they flie from the Lands to the Waters, beating the Waters with their Wings, fore-shew Rain and Wind.

13. If the Circles about the Sun be red and broken, it portends Wind; if thick and dark, Wind, Snow, or Rain, and the same of the Circles about the Moon.

14. The Trefoil Grass, against Rain, swells in the Stalk, and standeth more upright.

15. The Winowpipe (growing in Stubble-fields) if you find it open in the Morning, be sure of a fair Day to follow.

16. Aches, Hurts, and Corns, do engrave against Rain, Snow, or Frost.

17. Worms coming out of the Earth, Moles casting up the Earth, Fleas biting more than ordinary, are evident Signs of Rain to follow.

18. Solid Bodies, as Stone and Wainscot, when they sweat, doth fore-shew Rain.

Now

*Natural Prognosticks of Pestilential, and
Unwholsome Years.*

1. **W**Hen there are great number of Frogs, Flies, Locusts, &c. For these Creatures being ingendred of Putrefaction, shew a general disposition of the Year, and constitution of the Air to putrefaction.

2. When Worms are found in Oak-Apples.

3. Great and early heats in the Spring (and chiefly in *May*) without Winds.

4. Great drought in Summer, continuing to the end of *August*, portend a Pestilentious Summer the next year.

5. The Small Pox, Purples, and Agues in the Summer, and hovering all the Winter, portend a great Pestilence the Summer following.

6. A dry *March* and a dry *May* portend a wholsome Summer, if there be a showring *April* between:

Signs of a Sound and Pure Air.

1. A Sound and Pure Air is made not presently after the Sun-rising, and is made cold immediately after his setting.

2. That which yieldeth a pleasant smell after Rain, clear, and not evaporated, open and lightsome, and when the North-wind bloweth.

3. Where there are Easterly Winds in the Mornings.

Signs of Corrupt and Infectious Air.

1. A Corrupt and Infectious Air is made by the often blowing of the South, or South-East Winds:

Winds: or by the West, or South-West Wind in the Evening.

2. When the Air is cold long after Sun-set.
3. When the Air is long hot after Sun setting.
4. When the Air is long close, cloudy, or thick.

How to judge of Diseases by the Urine.

1. **U**Rine fat and troubled, betokens a burning Fever of choler: Or red and thick all over, with a black Circle, sheweth sickness all over the Body.
2. Urine white and thin, and little in quantity, sheweth cold in the Body.
3. Urine clear, with a black Circle, sheweth the sick Person hath the Ptisick.
4. Urine red and thin, with a bright Circle, shews a bad Stomach.
5. Urine thin, and greenish above, shews a cold Complexion: if blew in casting, 'tis the Ptisick.
6. Urine thin, if it shew black above, betokens great loss of Nature.
7. Urine thick and troubled like Horse-piss, signifies the Head-ach.
8. Urine fat in the bottom, white in the middle, and red above, shews a Quartan Fever.
9. Urine fat like Flesh, with dregs in the bottom like shadowing, shews the Dropsie by cold: But if it be wheyie above, clear in the middle, and shadowing beneath, it shews a hot Dropsie.
10. Urine with black dregs in the bottom, like gobbets of Coles, sheweth Worms.

11. Urine

11. Urine with black Contents (as moaths) in the middle, shews an Impostume.
12. Urine with Contents like shavings of Parchment in the bottom, sheweth stopping of Reins and Pipes of the Liver.
13. Urine black and green, with long white Contents, signifies the Palsie.
14. Urine that hath Grains under the Circle, sheweth the Stomach is full of Worms, and also burning of the Heart.
15. Urine foul above, sheweth heat in the Heart, Lungs, and Spleen.
16. Urine with black Contents in the bottom, shews Costiveness.
17. Urine that is long lasting, betokens biting in the body, and great Rheume.
18. Urine thick, little in quantity, and high coloured, shews great burning in the Body.
19. Urine Frothy, clear and a little Red, shews pain in the right side.
20. Urine Frothy, sheweth wind and pain under the left side,
21. Urine very Red, sheweth an Impostume on the Liver.
22. Urine as Red as burn'd Gold (if it be Hydropick) betokens Death.
23. Urine in a hot Fever, one part Red, another part Black, another part Green, and the other Blue, betokens Death.
24. Urine in hot axis, Black, and little in quantity, and stinking, betokens Death.
25. Urine all coloured as Lead, sheweth a prolonging of Death.

26. Urine

26. Urine dark, and clear beneath, betokeneth Death.

27. Urine that shineth raw and white (if the skum in the bottom shines not) shews Death.

28. Urine thin in substance, fleeting above like a dark Skie, betokens Death.

29. Urine dirty, stinking, and a dark Skie, betokens Death.

30. Urine like Water, with a dark Skie, in a Fever sheweth Death.

31. Urine with dregs in the bottom, mingled like Blood, sheweth Death.

32. Urine black and thin, (if the sick do loath when he goes to the Stool, and speaks overthwart, or understands not aright) if his sickness goeth not from him, it signifieth Death.

A Description of the Magnitudes, Motions, and Distances of the Seven Planets.

A Rgol, a laborious and learned *Astronomer*, giveth this account of the Planets Motions and Distances, to wit:

Saturn, Nine times.

Jupiter, Fourteen times.

Mars, Two thousand five hundred thirty five times.

Venus, Twelve hundred and seventy times.

Mercury, Three thousand seven hundred and five times.

The *Moon*, Ten thousand times.

The *Earth*, One hundred ninety six times.

The Sun is greater than

Saturn is greater than

Jupiter, The one half.
Mars, Two times.
Venus, Two hundred eighty six times.

Mercury, Four hundred and eighteen times.

The Moon, One thousand one hundred twenty two times.

The Earth, Twelve times.

Mars, One hundred eighty two times.

Venus, Eighty four times.

Jupiter is greater than

Mercury, Two hundred sixty six times.

The Moon, Seven hundred and Fourteen times.

The Earth, Fourteen times.

Venus is twice as big as Mars, and three times as big as Mercury.

Mars contains Mercury once and an half.

The Moon is greater than

Mars, Thirteen times.

Venus, Six times.

Mercury, Nineteen times.

The Earth

Saturn

Jupiter

Mars

The Sun

47490640

44720000

48958080

Saturn is distant from

Jupiter ——— 23138640

Mars ——— 29316440

The Sun ——— 3193352

The Moon ——— 36171600

Miles.

Jupiter

Jupiter is { Mars ————— 7722800 } Miles:
 distant from { The Sun ————— 9494880 }
 { The Moon — 13532960 }
 Mars is { The Sun ————— 1572080 } Miles,
 distant from { The Moon — 6310160 }

The Sun is distant from the Moon 4238080,
 that is, Four Millions, Two hundred thirty
 eight thousand, and eighty Miles.

*Hac incredibilia videntur tantum iis, qui Mathe-
 maticis demonstrationibus non assueverunt, &c.*

Of several Diseases incident to, CATTEL,
 with the CAUSES and CURES of them.

I. For the Disease in Beasts called the Sturdy
 or Turning-Evil.

T Here are divers kinds of this Disease, one
 in the Brain-pan, on one side or both:
 Another under the Horn-root, and another
 in the Neck-joynt: If it be in the Neck-joynt,
 or under the Horn, it is incurable: As for
 that in the Neck-joynt you may find it out by
 their Carriage, for they will hold up their
 Heads in the Air, and look wildly: And for
 the other under the Horn, they will turn
 round. Neither of these are curable; but for
 that in the Brain-pan it may be thus cured;

First cast them, and bind their Feet, then
 fit the Skin against the Brain-pan, and with a
 Needle and Thred sitch up the Skin out of
 your way; then take a strong short Knife and
 Hammer, and cut the Scaupe two inches
 square,

square, and turn it up, and then you may see the Bladder; then take it out very carefully, for fear of breaking it, and cast it away, anointing the place with fresh Butter, and always apply warm Cloaths, for fear of the Cold; and be very careful that you lay the Scaup on again in the right place, and then turn down the Skin, and stitch it down with Silk close together; then make a Plaister of Turpentine, Wax, Rozin and Swines-grease or fresh Butter, and a Plaister of Flax-hards, and lay on four or five doubles of Woollen-cloth to keep it from Wind and Weather; remove the Plaister once in five days, and let the Beast drink no cold Water in eight or ten days or more, and it will do well.

II. *For a Cough, or shortness of Breath in Cattel.*

If a Beast be troubled with a Cough, and be curable, this Medicine will cure it.

Take a Quart of new churned Milk, and beat in some Tar and a head of Garlick clean peeled, Alicampane made into Powder, and a little brown Sugar Candy; blend all together, and give it the Beast Three Mornings together, and if curable this will do it.

III. *For the Milking of a Beast.*

The Milking of a Beast is when they have got a stroak with a Goad or Cudgel, or a rush against a piece of Timber. The Signs are when they lay themselves down they will rise again

gain presently and cannot rest but sit in pain.
To cure this Distemper, take Stone Pitch
and pound it small, and blend it with Ale,
Saffron, and Pepper, and give it him, walking
him a little after it, and he will presently
mend.

IV. *Of sore Eyes in Ox, Cow, or Calf.*

There is a Distemper in the Eyes called the
Inflammation, which cometh by the
Blood, and breedeth Blindness, sometimes the
Beast sees a little, and sometimes not at all. To
cure this, Cord them in the neck, and bleed
them very well in the temples under the eyes,
then put in some live honey and burnt allom,
mixed together, every day, and the eyes will
certainly mend.

V. *Another cure for sore Eyes.*

Burn Mutton Bones very well, pound them
to powder, and searse them; then take
burnt allom, tuttee, white Sugar-candy, mix all
with the juce of Ivie, and it will help them that
have a Fleam that cometh by a blow. Also the
marrow of a Goose-wing is good to cure the
same.

VI. *Another cure for sore Eyes in Cattle.*

Burn Egg-shells between two Tileshads, and
when they are burnt pound them, and
searse them, and with a Quill blow this Powder
into the Beasts eye 2 or 3 times a day, and they
will mend presently. Also the former Powder

B

and

and white Sugar-candy mixed with Butter without Salt, into a Salve; the eyes anointed with this 3 times a day, will certainly heal them.

VII. Of an Axberry or, Wart in any Beast, the Cause and Cure.

THis Disease is most incident to young Beasts, under 5 years old; It cometh of blood, and is a spongy kind of flesh, full of blood and water. The cure is several ways, (1) If it be a great one, take 8 or 10 Horse-hairs, and tie them as hard about it as you can, and in 8 or 10 days time you will see it fall away; then heal it up with unslackt Lime and Honey. (2) If it be a flat one, sear it off with an hot Iron, and heal it up as before. (3) If it be amongst sinews and veins, you must eat it away with Mercury or Rosulger; then stop the hole with flax and whites of eggs for two days, then heal it up with Powder of unslackt Lime and Honey.

VIII. Of Madnes in the Head in Cattel, as of Bull, Ox, or Cow. And how to cure it.

FOR madnes in the Head, it proceedeth principally from the Blood, and this Disease may easily be discovered: For Beasts thus troubled will reel as they go, will set their head into their neck, or against a Wall, Tree, or Gate, so fixed, that a Man or two can hardly move them. For the cure of this Distemper, the following Receipt is excellent. You must first Cord them in the Neck, and blood them very well in the Temples under the eyes, and in the ears; then give them in a Quart of strong Ale Fenigrick, Turmerick, Long Pepper, and Green Aniseeds, of each a like quantity, with some juice of Rhu. Give it them milk warm, the third next

half in at the nostrils, the other at the mouth, and it will undoubtedly cure them, if taken in any time.

IX. *Of the Yellowness in the Bodies of the Beasts, the Cause and Cure.*

Of all Diseases in Cattel, this is the Original or Fore-runner, and it is easily discovered: For Cattel being infected therewith, will be yellow in ears, eyes, end of the tail, and sometimes all over the body. To cure this Distemper, you must bleed them well, both in the ears and tail, rubbing them, that they may bleed the more freely: Then put some Salt into their ears, and give them two handfuls of Salt dry overnight down their throat: In the morning give them Penegrick, Turmeric, Long-pepper, Aniseeds, and Liquorice made into Powder, and all put into strong Ale milk-warm. This is a certain Cure.

X. *Of the Blend water, the Cause and Cure.*

Some call this Disease, The Morehow: It is occasioned several ways, (1) by Blood. (2) from the Yellowness. (3) from change of ground: For hard ground breedeth this. It may be thus cured: Take one penniworth of Bolearmonick, and as much fine flower of Charcole as will fill an Egg shell, and a good quantity of the inner Bark of an Oak dried and pounded; Put all these into a quart of new Milk, and a pint of Erning. Give this to the Beast two times, and it will cure him.

There is another cure for this Distemper which never fails.

Take a Quart of new-churn'd Milk: Also take a good piece of Lean Salt-hung-beef broiled upon the Coals, till it become a Coal it self, and when cold make it into Powder; Take also a penniworth of Bolearmonick pounded, and a handfull of Shophers Puff, put all these together into the milk, and give it the Beast. This Receipt never fails.

XL. *Of the Worm in the Tail, the Cause and Cure.*

THis Disease is discover'd by the Tail it self, for sometimes the hair will go off where the Worm is, but most commonly the Joynts are eaten asunder therewith, so that they will knock one against the other, and this is the certain token. It may be thus Cured: Slit the Skin of the underside above the decayed Joint, and just against the Vein: Then prick the Vein, and let it bleed very well: Then take Garlick, Butter, and Salt mixed together, and apply it to the wound, binding it up, and it will soon mend.

Of the Four Quarters of the YEAR

1 6 9 2.

OF WINTER.

Winter Quarter (after the *Astronomers Account*) began the 12th of *December*. 1691, at 13 min. past 1 in the Morning, and continues till the Tenth of *March* this year 1692. So that always the first part of the Astronomical Winter Quarter, is in one Politick year, and the latter end thereof is in the other. At which time was the shortest day of the year, by reason of the Suns greatest declination from the Equinoctial Line.

This Season of its own disposition, is known to be cold and moist, contrary to the quality

quality of the Summer; and, in this Quarter the inward parts of Man are very hot, and being healthful, may receive plenty of Food, because natural heat is now comforted, and is gone inward, and there increaseth, and maketh Digestion the better.

The Sickneses whereunto this Quarter is most inclined, are *Rheums, Gouts, Pustles, Sore Eyes, Melancholy, Coughs, Catarrhs, Sciaticas, Falling-Sickness, Diseases proceeding of Rheumness and Corrupt Humors*; with divers kind of *Infirmities* incident among Women.

Of the SPRING.

THe Spring-time (being the most pleasant and Wholsom Season of the Year) taketh its beginning on Thursday the Tenth of *March*, 50 min. after 10 in the Morning, when the Sun entereth into the first minute of the Equinoctial point *Aries*, making the days and nights of equal length; which Quarter endeth the 10th of *June*, when the Sun entereth into *Cancer*.

This season is naturally hot and moist, and is of the Sanguine complexion, being the most temperate and healthful time of the year, and is therefore accounted the fittest time to ease diseased Bodies in, and to restore health again in those in whom formerly it hath been decayed by any kind of evacuation.

The Infirmities of this Quarter are *Melancholy, Madness, the Falling Sickness, Bleeding at the Nose, Hoarseness, Coughs, Itch, Scabs,* many

many *Ulcers*, and small *Apoſtumes*, the *Gout*, and
Pain in the Joynts, *Pleurifies*, *Droſies*, *Peſtilen-
Agues*, *Shortneſs of Breath*, *Faintings*, *Pain in
the Head*, *Eyes*, and *Stomach*, *Rotten Feavers*,
and other *Strange Diſeaſes*.

Of SUMMER.

Summer (accounted the Third part of the
Year *Aſtronomical*) taketh always its be-
ginning at the time of the Sun's entrance into
the firſt min. of the Solſtitial Sign *Cancer*, which
is this year on Friday the 10th of June, 5
m. after 6 at night, at which time he make
his greateſt declination from the Equinoctia
towards the North, and cauſeth the longeſt day
and ſhortheſt night in the year; and ſo Summer
holdeth on till the 12th of September following.
In this Quarter the Stomach cannot digeſt
ſuch hard Meats as it will in the Winter ſea-
ſon, for that natural heat is now diſtributed
into the exterior parts, and man is not now
hot within as in Winter.

The Sickneſſes at this time are divers,
Burning Agues, *Pleurifies*, *Frenſies*, *Hot Apoſ-
tumes*, *Divers pains in the Head*, *Sundry Inflam-
mations*, and *New Infirmities*, proceeding eſpecial-
ly of *Hot Cholerick Humors*, wherewith man
will be fore moleſted.

of **AUTUMN** or **HARVEST.**

A *Utumn* or *Harvest* (being the Fourth, or last Quarter of the Year) beginneeth upon Sunday the 11th of *September* at 10 and 4 min. in the Morning, the Sun then making his entrance into the first minute of the second equinoctial Sign *Libra*, working the same effect that he did at his entring into *Aries*, that is, making the days and nights of equal length, rising at six in the morning, and setting at six at night; and this Quarter doth last until the eleventh of *December* following.

The quality of this Season is naturally cold and dry, yet, by reason of its mutability, it is the most unwholesome; by means whereof, it is more subject to sickness than any other: for the seeds of all diseases, of the former parts of the year, will now break forth and be seen.

The Diseases of this Quarter are like to be many and dangerous, as *Black Jaundies*, *Adrenas*, the *Falling-Sickness*, *Oppilations in the spleen*, *Difficulty of Breathing*, *Convulsion Fits*, *Dropsies*, *Sciatica's*, *Biles*, *Tooth-ach*, and many more: From which good Lord deliver us;

of

Of the ECLIPSES this YEAR, 1692.

T Here will be Five Eclipses this Year, viz. Three of the Sun and Two of the Moon; Of which only Two (one of the Moon, and one of the Sun, will be conspicuous to us in England.

The First Visible Eclipse will be of the Moon, upon the 18th. day of July, 10 min. after 3 in the morning; It will be a great Eclipse, and the former part of it will be seen of us, but the latter part cannot, for that the Moon will set Eclipsed.

The Second Eclipse will be of the Sun, upon the 7th. day of December, at half an hour past 1 in the Afternoon. It will be a very small Eclipse, and so hardly to be discerned without the help of a Telescope.

FINIS.

ADVERTISEMENTS

M R. Robert Bateman's Famous Spirit of SCURVY-GRASS, both Plain and Golden, which have performed so many eminent Cures in the Dropsie and Scurvy, and other Disorders, are still rightly prepared by John Hooker at Pauls-Chain near Doctors-Commons. Price 1s. the Bottle.

The grand Balsamick or Health procuring and preserving Pills, approved by the most Eminent Physicians of England, to be one of the safest and most pleasant Purgers; their virtues are printed at large, prepared and sold by John Hooker at his House in Pauls-Chain near Doctors-Commons: Price either 6 for 8 d. or 9 for 1 s. with Printed Directions.
